What we do

We strive to be the best at what we do and offer

- » Standard and oversized transportation services
- » Interim storage

Available Logistics Services

Road Freight Services

Sprint transport offers full support for all of your road freight needs. We support local, interstate, and international road freight transport, including standard, oversized cargo, and partial loads. We operate through an established network of road freight carriers who have been through our extensive screening process. Types of our services:

Truckload Freight Shipping

- Dry van - Using a dry van carrier is best matched when you are transporting normal packaged freight that has no specific instructions or special requirements.
- Flatbed - When you are shipping larger manufacturing and construction equipment, choosing a flatbed carrier will often provide the best solution which is flat, open bed trailer.
- Step Deck - When a load needs to be closer to the ground to accommodate forklift loading and unloading, step decks or drop deck trailers are the best equipment for the job.
- Double Deck Trailer – when you have a lot of loads in small sizes.

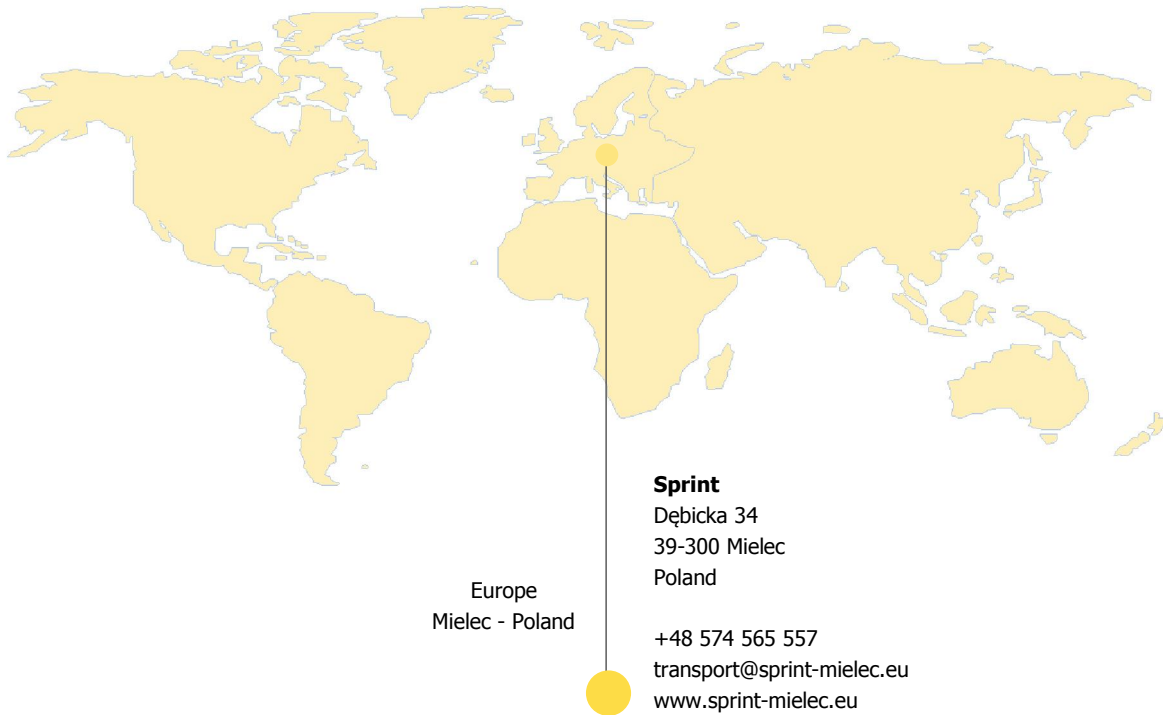

Specialized Services

- White Glove Service - Everything is taken care of for you. Your item is picked up from its location and delivered to the location you want. All preparations and shipping are included.
- Time Critical or Expedited Freight - We can arrange for your item to be picked up today and delivered high speed.
- Oversize Freight - Oversize freight can sometimes require special trucks or special handling equipment. Either way, we've got you covered.

Interim storage

Sprint transport offers in-house interim storage for product and materials. Fully roofed and covered warehouse located next to the Sprint headquarters provides protection and a safe area for your property.
